SUMMARY

AI Enabled Product-minded technology professional with 2+ years defining requirements, decision logic, and success metrics for enterprise platforms used by 2000+ employees across one of India's largest telecom operators. Experienced in translating ambiguous operational problems into structured specs (BRDs, functional specs, decision trees, FRDs) that engineering teams build against, with a track record of measurable adoption and efficiency gains. Comfortable working directly with data (SQL, Python, Power BI) to validate product decisions and drive cross-functional stakeholder alignment. Seeking Business Analyst / Associate Project Manager roles where technical fluency and requirements ownership both matters.

CORE SKILLS

Business Analysis: Requirements Gathering, BRD/FRD, User Stories, Gap Analysis, Process Mapping, UAT, Stakeholder Management, Product Backlog, User Onboarding, Wireframing, Prototype Creation.

Data & Analytics: SQL, Python, Power BI, Advanced Excel, KPI Design, Dashboarding

Tools: Jira, Confluence, ServiceNow, BMC Remedy, Figma, Visio, Git/GitHub, Claude, Emergent, Lovable

EXPERIENCE

Process Analyst - Assistant Manager - Bharti Airtel Limited *Jul 2024 - Present*

Owns requirements and decision-logic design for governance and change-management platforms used across Airtel's national network operations.

- **Owns end-to-end requirements and rollout sequencing for a 6-module change-management suite:** Roster, Scheduling, Auto Assignment, Plan Validation, Impact Analysis & Approvals.
- **Delivered 5 of 6 Change Management Suite modules to production,** translating operational pain points into functional specs and contributing to enablement of 250 FTE.
- **Leading rollout of the CMS Approvals module** (final module), projected to enable ~50 additional FTE upon completion.
- **Authored the BRD and functional specification for ARC,** a centralized automated approval engine consolidating CRQ governance across the network.
- **Designed and shipped an auto-approval workflow** correlating ARC data against Access Requests in ServiceNow, cutting approval decision time from ~20 to ~5 minutes and enabling 7 FTE capacity.
- **Defined product requirements and decision logic for NERVE,** an AI-powered CRQ risk-assessment engine with a 6-factor risk-scoring model and 10+ conflict/deviation-detection scenarios.
- **Scaled NERVE PAN India across 21 circles,** flagging 5,000+ conflict/deviation cases per month and reducing network outages by 15%.
- **Built a Power BI operations dashboard** giving leadership real-time visibility into automation adoption and raising compliance by 20% across circles.
- **Rolled out the UDAAN escalation framework,** aligning cross-circle stakeholders to design 30+ automated workflows and cut resolution delays by 25%.
- **Enabled real-time performance monitoring** for the UDAAN framework through dedicated Power BI dashboards adopted NOC-wide.
- **Authored UAT observation sheets and leadership status trackers** for the CMS Scheduler module, aligning engineering and operations stakeholders.
- **Recognized for delivery impact across 3 award cycles:** Three Airtel Ace Awards (Roster; Auto Scheduler; CMS Auto Assignment, Plan Validation & Impact Analysis) and a Collaboration & Influence Award (ARC).

Graduate Engineer Trainee (Intern) - Bharti Airtel Limited *Feb - Jul 2024*

- **Orchestrated a monitoring dashboard from scratch: Analysed 1,200+ telecom alarms from the NMS** using SQL and Python, **reducing false alarms by 17%,** the output is fed into a Netcool monitoring dashboard used daily by 50+ NOC team members, **saving 2 hours per day**.

EDUCATION

B. Tech, Computer Science & Engineering (2020-2024) - Guru Nanak Dev Engineering College, Ludhiana *CGPA: 9.07 / 10*
